

How to Load Listing Images with Restb.AI – Paragon Connect

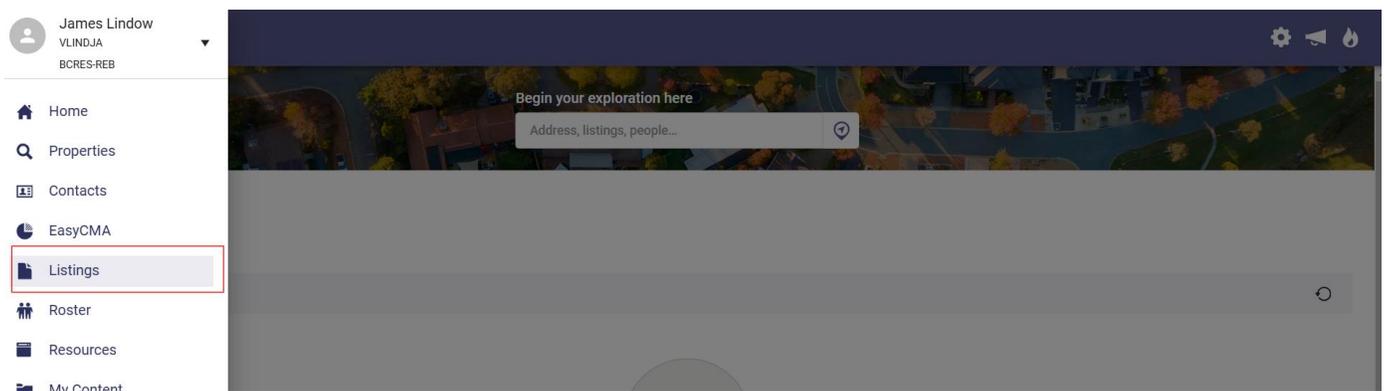

To upload images, ensure they are saved on your computer in a folder for easy access.

If you do not wish to use Restb.AI to generate photo labels, descriptions or public remarks, please follow this guide to step 6 and opt out.

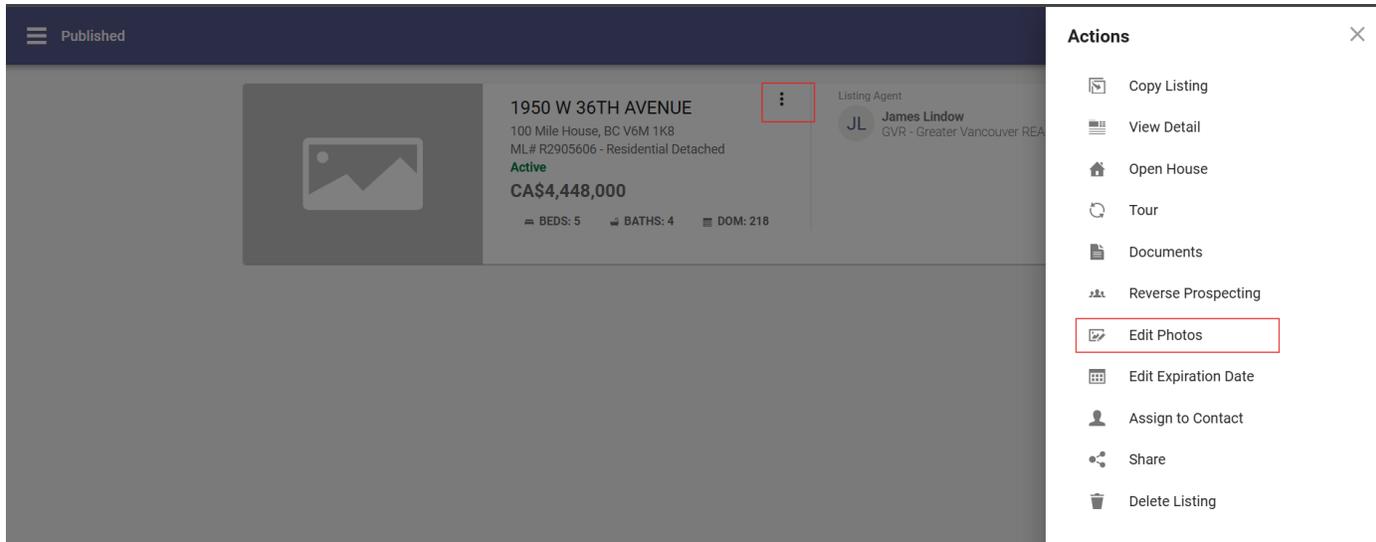

1. Click the **menu side bar at the top of the page**

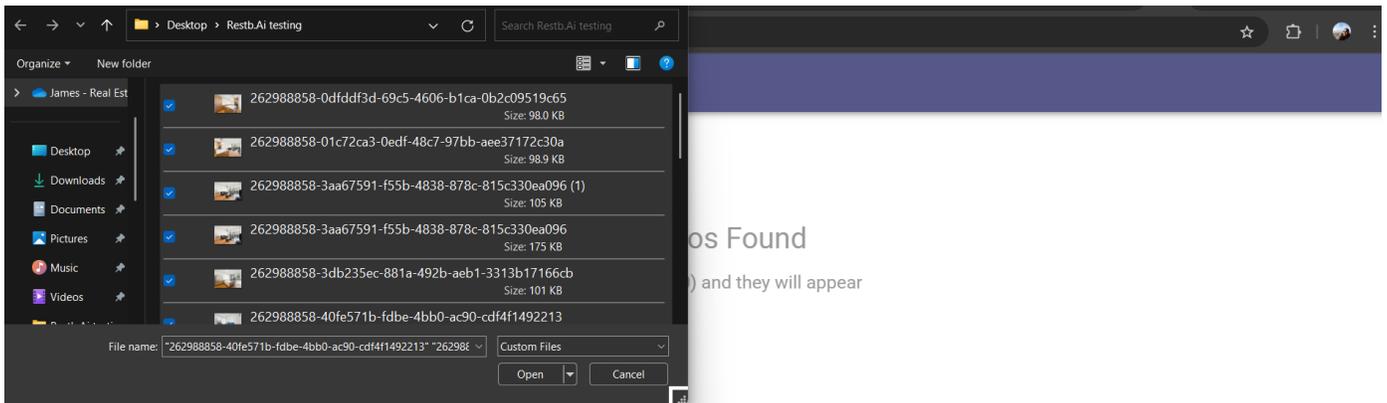

2. In the side bar menu, click **Listings**.

3. The list of your active properties will be found in the “Published” section and by clicking the three dots to the right of the address will open your actions menu. From here, please select “Edit Photos”

4. By clicking the plus symbol in the bottom right of the screen, you will now see a folder window open to add photos from any selected folder. On your computer, browse to the folder and select the images you would like for your listing. If you would like to load more than one image at a time, press the CTRL key on your keyboard and select all the required images and click the Open button when done selecting.

5. Once the upload has taken place, Restb.AI will warn you of possible photo violations, please review the possible violations by accepting or deleting.

Phone Number Displayed, Person, Phone Number Displayed, Face Displayed
Click warning text to toggle highlighting within photo

DELETE ACCEPT

- Once you have cleared your possible violations, click next in the top right corner and you will now see your photos with AI generated labels and descriptions as seen below. **PLEASE NOTE:** Should you wish to opt out of AI generated labels and descriptions, please close out of the screen, by selecting the X in the top left corner. This will save your listing photos without generated labels or descriptions.

<p>Label: Kitchen</p> <p>Description: Kitchen with a kitchen island</p> <p>Characters remaining: 226</p>	<p>Label: Kitchen</p> <p>Description: View of kitchen</p> <p>Characters remaining: 240</p>	<p>Label: Living Room</p> <p>Description: Living room featuring wood-type flooring</p> <p>Characters remaining: 215</p>
--	--	---

- This is your opportunity to review the AI generated labels and descriptions to make sure that they are to your liking. Should you wish to edit the label or descriptions, please click in the relevant box and make your edits. Once you are done, click save in the top right corner and then close out of the screen by selecting the X in the top right corner. This will bring to the Listing Input Maintenance screen where you can choose to AI generate your public remarks. If you do not wish to AI generate remarks, please click save in the bottom left corner.

- To AI generate remarks, select Marketing Instructions in the list of drop down menus and click the Auto Generate button, under the public remarks. Once you have generated your remarks, select save in the bottom right corner.

The screenshot shows a real estate listing management interface. At the top, there is a dark blue header with a menu icon, the word "Published", and utility icons. On the left, there is a property photo and a text block containing the listing details: "ML # R2905606", "1950 W 36TH AVENUE", "100 Mile House, BC V6M 1K8", and "Residential Detached". The main content area is a list of dropdown menus: "Contract & Location", "Agent & Office", "Showing/Photo", "Property Details", "Room Information", and "Bath Information". Below these is the "Marketing Instructions" section, which is expanded. It contains three text input fields: "Realtor Remarks" (with text about measurements and KeyPlan), "Public Remarks" (with a character count of 800), and "Internet Remarks" (with text starting "This impeccably built home in"). A blue "AUTO GENERATE" button is highlighted with a red box in the "Public Remarks" field. At the bottom right, there is a blue circular "SAVE" button. A "Privacy Flag" dropdown is also visible, set to "Y - **Privacy Prot**".
